Mr and Mrs K Schlecker
Mr and Mrs Barth
Miss Helen Wibray
Mr and Mrs A P Anderson
Mr and Mrs W Allen
Mr and Mrs Leader
Mr and Mrs M Bowser
Mr and Mrs Geo Shaul

A Great Picture.

What should prove of interest to movie picture patrons is the announcement that the greatest production ever filmed, "The Life of Christ," the story of the Saviour, is coming to Stony Plain the evening of Saturday next, August 15. There will be sacred music by the Boy's Choir, with Velasco at the organ. This is said to be a picture which "will live forever in the hearts of mankind."

On the same program will be seen "City of David," "Beethoven" and "Unity of All Nations." The prices have not been raised for this special event.

Binder Twine Prices.

Following a number of complaints from dealers in Northern Alberta that the practice of binder twine price cutting was making the profitable sale of binder twine an impossibility, a meeting was held last week at the office of W D King, deputy minister of trade and industry, in an effort to eliminate the practice.

The Government issued no instructions or authorized no definite action, but suggested greater uniformity of prices. Certain prices were then agreed on by Edmonton dealers.

The price of twine in Stony is the same as Edmonton—\$10.15 for 550 feet, plus 10c freight.

Beware of False Registrars.

In an article in the Wetaskiwin Free Press J A Wingblade, M.L.A., announces that he wishes to meet the registrars at the social credit rooms, and adds "at the same time I wish to warn against false registration. I am informed that certain persons are pretending to be registrars and are charging 25 cents for each one registering. Anyone asking for 25 cents for registering your name has no connection with the Social Credit Government. Registration is free, and the registrars are all doing their work gratis."

Age and Mental Capacity

In these days when much is heard of proposals to retire the elderly to allow youth to take their places, the aged and those who have passed what is commonly understood as the years of their prime will derive a good deal of comfort from recent discoveries of eminent psychologists.

In brief, it has been discovered by actual tests, not promulgated as mere theories, that—(1) Mental power does not decline with age, contrary to popular misconception, and (2) That the ability of adults of advancing years to learn new things is almost as great as that of youth.

The first-mentioned discovery, that the mind does not grow old in step with declining physical powers, is the result of tests made by Dr. Irving Lorge, psychologist of Teachers College, Columbia University, but according to Albert Wiggan, in an article in the Reader's Digest, older people require a little more time than their more youthful contemporaries to arrive at the same mental conclusions, the additional time required increasing somewhat with advancing years. In other words, there is no decline in mental capacity as one grows older, but there is a slowing down in the speed of mental processes.

As the result of a recent revision of mental tests given some years ago to hundreds of people ranging in age from ten to 90 years of age, in which all the tested were limited to time in answering the questions put to them Dr. Lorge found that with a power premium added to compensate for lack of speed the older age groups not only showed no loss of intellectual power but "the people of 50 and 60 had higher scores than those around 25. This increase," he adds, "may have been partly or largely due to the death of the slower and duller people."

When to this discovery is added the findings of Professor Edward L. Thorndike that older people have as great an ability to learn as youth, at least up to the age of 50 and 55, the older generations not only have no reason to believe that they should be "put on the shelf" but have good cause to decide that they are as valuable an asset to society as they were 30 or 40 years ago.

Dr. Thorndike's tests resulted in the general conclusion that "adults up to at least 45 can learn new things about as well as young people in their late teens; and that, while learning ability seems to decline very slowly from the age of 25 on, this small decline is offset in many cases by the older persons' interest in the subject, their feeling of its immediate practical value, and other factors, so that the real mental output of people up to 50 or 55 is often greater than that of people of about the same intelligence, working at the same tasks at 20 or 25."

Summing up his own conclusion as the result of his tests, Dr. Lorge said: "As far as mental ability is concerned, there need be no retiring age. The probabilities are that the older a person becomes, the more valuable he becomes. He possesses the same mental power he had in his young manhood plus his wealth of experience and knowledge of his particular job. These are things that no youngster, however brilliant, can pick up. For the same reason there is very definite value to the idea of 'elder statesmen' in politics and business."

These definite discoveries, established by exhaustive tests, should result in the re-establishment of confidence in their own powers on the part of the older generations and should serve to remind people of advancing years that there is no occasion for them to retire into their shells under a mistaken impression that they are "back numbers" and that there is no necessity to relegate themselves to mental arm chairs.

On the contrary, the announcement of these proven discoveries should stimulate the older folk, who have already accustomed themselves to the idea that their mental powers are inevitably failing because of advancing years, to again come out in the open and resume the place which their capacities warrant in the life of the family, the community and the nation. No longer need they imagine they are deficient in the essentials of happy and successful lives—mental capacity and ability to learn.

To again quote Dr. Lorge: "As the years advance, we should with quiet confidence, allow ourselves a little greater handicap for time, but as far as mental power is concerned, I believe, we can now be assured that we need not allow ourselves any handicap at all."

Biplane Goose Flies High

Makes Good Use of Its Double Pair of Wings

Emilio, the biplane goose, soared over the barnyard of Douglas Sawyer, Hermon, N.Y., farmer, using its double set of wings to good advantage.

The bird, exhibited as a goodling at the New York State Fair last year, was said by poultry experts there to be the only one with two pairs of wings to their knowledge. The goose uses both sets of wings to fly. The upper are larger and longer. The second or under pair is much shorter.

To Study Communications

Empire Problem To Be Studied By Committee in England

The whole problem of Empire telegraphic communications will be examined by a committee of representatives of the dominions and colonies, under the chairmanship of Sir Campbell Stuart, chairman of the Imperial Communications Advisory Committee and a native of Montreal.

In an address to the summer school of the Royal Empire Society, Edward Wilshaw, chairman of Cables and Wireless, Limited, announced the proposed committee.

Emphasizing that empire telegraphic communications constituted an essential part of the defence problem, Wilshaw pointed out that hitherto the British Empire had predominated in the matter of world communications, but that her position was now being seriously challenged.

There was grave danger, he said, that these communications were becoming wholly uncommensurate.

The governments of the Empire had agreed on the formation of the committee, he said, and he was confident a satisfactory solution would be found.

Explorers in the Yukon territory, Canada, during 1935, discovered 19 new mountain peaks more than 10,000 feet high.

Honor Memory Of Haig

Vimy Veterans Remember Commander Of British Armies In France

The ancient abbey at Dryburgh, Scotland, whose ruins have for four centuries looked over the rippling River Tweed, was the locale of a service which saw the homage of the government and people of Canada paid to the memory of Earl Haig of Bemerseyde, who commanded the British armies in France during the war.

At the same time a wreath of poppies and Canadian maple leaves was deposited on the simple soldier's cross which marks the sepulchre of Haig.

Rev. John Kelman, minister of Fairbank Presbyterian church, Toronto, and national representative of the tuberculous veterans' section of the Canadian Legion, was the preacher at the special service which was attended by members of the Vimy pilgrimage, representatives of the Canadian government and many Scottish dignitaries.

The Toronto minister recalled the "scourious attacks" on the memory of Haig by those "who had become bold enough to launch them only when his great soul was silenced forever." There had been met with calmness, with dignity and unflinching courage by Lady Haig, widow of the dead commander.

Used Notes in Braille

War-Blinded M.P. Gave Speech In Broadcasting Debate

It was a surprise to most M.P.'s to see Sir Ian Fraser using notes for the speech he made in a broadcasting debate. Sir Ian is the war-blinded M.P. who was responsible for getting blind people the privilege of free wireless licenses.

The notes he used were embossed in Braille on light brown cards rather thinner than playing cards. Each card contained only one or two words as a heading for a section of his speech. Sir Ian Fraser held his notes in front of him and passed his finger along the card to give himself his next point. Using notes in this way he kept his head up, and his voice was not interrupted like those of most M.P.'s when they look down at their manuscript.

On the other hand, Major Tryon gave an example of a speech rendered largely inaudible by the use of a manuscript. The Postmaster-General's fault was the more glaring—London Daily Telegraph.

Anglo-Russian Trade

Commercial Agreement Establishing Credit For Soviet Orders

An Anglo-Russian commercial agreement establishing a £10,000,000 (\$50,000,000) credit for Soviet orders for British exports was announced in London by Walter Runciman, president of the board of trade.

Russian orders are to be placed by Sep. 30, 1937. Runciman said the Soviet trade representative had given formal assurance that Russia intends to place orders up to the full limit of the credit. They will not, however, include munitions.

Runciman also announced suspension of Anglo-Italian negotiations for the resumption of trade. Italy, he said, was unwilling to accept any arrangement in regard to trade debts which could be considered "adequate."

At the same time Italy is imposing severe restrictions on imports from the United Kingdom, he stated.

Old Italian Theatre Found

Contained Relics Dating Back To Time Of The Caesars

Discovery of an Augustan age theatre, regarded as one of the most important archaeological finds in Italy in recent years, has been announced. Even remnants of the machinery for raising the curtain were uncovered in the well-preserved centuries-old building.

It was found on the site of the ancient town of Casinum and among the relics yielded were inscriptions, statues, money and stagecraft utensils dating back to the time of the Caesars.

Casinum was the ancient Italian town where Mark Antony was reputed to have lost his origins and where, at the foot of a mountain, the Romans constructed a still-existing amphitheatre.

DIVERS REASONS

Just try Ogden's Fine Cut and you'll know why "roll-your-owners" are diving into Ogden's, now that better times are here. You can taste the reason! Ogden's IS a better tobacco; it rolls cigarettes that are smoother, cooler and more enjoyable. Next to a "tailor-made" there is nothing like the cigarette you roll yourself, with Ogden's Fine Cut and "Vogue" or "Chantecleer" papers.

Ogden's is Cellophane-wrapped and has the purple easy-opening device.

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug.

Theatres in Russia

Eleven Thousand Motion Picture Palaces To Be In Operation

Eleven thousand sound equipped motion picture theatres will be in operation in the Soviet-Union by the end of 1936, according to government plans. The number of theatres, motion picture houses and circuses of all types is expected to reach 44,800, an increase of 8,000 over 1935 figures.

New theatres will be built in Moscow, Leningrad, Alma-Ata, Kazan, Simferopol, Ulan-Ude, Chelyabinsk, Baku, Karkov, Ashkhabad and many other cities.

Construction of the country's largest motion picture theatre has been completed in Leningrad. It carries out the traditions of a "movie palace." The facade of the five-story building is adorned with 15 pillars of Karelian granite. The interior of the building is faced with marble, and adorned with bas-reliefs. Seats are provided for 1,500 spectators.

Just A Point Of View

Many Would Think Experience Of Girl Exciting Enough

When Gloria Hollister, the yellow-haired girl who has been nearer the floor of the ocean than any other living woman, came back not long ago from the zoological expedition she headed to British Guiana, South America, she announced that nothing exciting had happened.

That's all in the point of view, however. Miss Hollister, bred to adventure, thinks little of travelling over hundreds of miles of jungle—some of it never before seen by a white man—in a one-motor plane.

The zoologist, though still in her twenties, is a member of the New York Zoological Society. Once, when the party of 20 was travelling by boat on a lonely river, they discovered, on swimming on shore in the morning, that their boat had been sunk by the swollen torrents and heavy rains in the night. But it was raised and the party continued its journey.

May Get Radio Job

The London Daily Mail said the Marquess of Willington probably will be offered, and will accept, the presidency of the British Broadcasting Corporation. The B.B.C.'s new five-year charter comes into operation Jan. 1, 1937. Ronald Collett, Norman, brother of Montagu Norman, governor of the Bank of England, is president of the B.B.C. at present.

SELECTED RECIPES

DEVIL'S CAKE

- 2 cups brown sugar
 - ½ cup butter
 - 2 eggs
 - ½ cup boiling water
 - ½ cup cocoa
 - ½ cup sour milk
 - ½ cup teaspoon soda
 - 1 teaspoon baking powder
 - ½ teaspoon salt
 - 1½ cups Purity Flour
- Method—1. Cream butter with sugar thoroughly. 2. Add well-beaten eggs. 3. Dissolve soda and cocoa in the boiling water and add to Mixture No. 2. 4. Sift flour with baking powder and salt and add alternately with milk to Mixture No. 3. 5. Bake in slow oven of 300-degrees for 35 minutes.

ITCHING

TORTURE STOPPED by one instant! For quick relief from the itching of pimples, blotches, eczema, athlete's foot, itches and other skin eruptions, apply Dr. Denzil's ointment and wash with Dr. Denzil's soap. Its gentle oils soothe the irritated skin. Clear, smooth skin shows in a matter of days. Stop the most intense itching instantly. A 35c trial bottle proves it—no money back. Recommended at drug stores for forty years. Ask for Dr. Denzil's Prescription.

WHEN USING WILSON'S FLY PADS READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY.

Each pad will kill flies all day and every day for three weeks.

3 pads in each 10 CENTS PER PACKET at Drugists, Grocers, General Stores.

WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

Some Details Of Canada's Part In Giant Scheme To Span The Atlantic By Air

Hon. C. D. Howe, minister of transport made public preliminary details of Canada's participation in a giant scheme to span the North Atlantic with aeroplanes carrying passengers and mail.

In a statement released soon after a similar declaration in London by Sir Philip Sassoon, under secretary for air, Mr. Howe announced Canada would join the United Kingdom and the Irish Free State in formation of a joint company to conduct experimental flights over the North Atlantic air route and to operate a subsequent commercial service.

The announcement was a confirmation of an agreement reached last December at a sub-imperial conference in which Canada, the United Kingdom, Newfoundland and the Irish Free State took part.

That conference decided to recommend to the government of concerned countries an early start of survey flights across the Atlantic and establishment as soon thereafter as possible of a commercial service operating on schedule not less than twice a week each way.

Survey flights, it was learned, were to have been started last April, but delay in approval of plans by some of the governments, coupled with shortage of flying boats, led in part, at least, to Britain's rearmament policy, necessitated postponement. It is regarded as doubtful if any flights will be made this year, as the North Atlantic flying season will be over in about two and one-half months.

The announcement said preliminary flights would be conducted by Imperial Airways, the United Kingdom's representative in the joint company. Imperial Airways has taken delivery already of at least one "Empire class" flying boat of "composite" type, a giant machine carrying a smaller and faster airplane on its back to be launched while both are in the air. The small machine is designed to carry mail for fast delivery.

The statement said it was understood Pan-American Airways would participate in the aerial survey. Pan-American, however, was said to be awaiting delivery of new planes.

The joint company and Pan-American will operate an Atlantic service on a reciprocal basis. In return for landing facilities which the United States will grant the joint company, the governments of Canada, the United Kingdom, Newfoundland and the Irish Free State will grant similar facilities to Pan-American.

Mr. Howe's statement said the joint company would be organized with the British participant holding 51 per cent of the capital subscriptions and the Canadian and Irish companies 24 1/2 each. He made no mention of any company or Dominion might nominate as its representative in the enterprise.

The announcement declared preference would be given to the North Atlantic route over Ireland, Newfoundland and Canada but that "it may be necessary during an initial period to operate the services by Bermuda during the winter months."

During the experiment stage flights will be financed by the British government. When the joint company whose organization may be delayed, assumes control of the route it will receive an annual subsidy from the participating governments. Canada, the statement said, "will contribute 20 per cent, up to a maximum of \$75,000 (about \$375,000), the Irish Free State five per cent, up to a maximum of \$12,000 (\$60,000), and Newfoundland a sum to be agreed upon between that government and the United Kingdom government. The remainder will be made up by the United Kingdom government.

The statement said each of the governments concerned had decided to grant to the joint company and Pan-American Airways exclusive landing and transit rights and that it was proposed the rights should be exclusive for 15 years. "Thereafter," it added, "the question of the exclusivity and the question of granting further financial assistance to the joint committee will be reviewed."

Scent Factories Grow Tomatoes

Julice Sells Well And Perfume Trade Has Fallen Off

Grasse, the world-famous hill-side city behind the Riviera, for many years supplied the world with the finest scents and perfumes known to women. To all corners of the earth, Grasse exported its products.

The late Tsarina of Russia used to have a very special altar of roses concocted for her; the secret of the scent was a closely guarded one.

The reigning beauties of Paris vied with one another for specially fabricated perfumes which only Grasse could produce.

The romantic hill-sides around this ancient city were covered with the finest blooms to be found anywhere in France. For miles and miles around the air was perfumed with the scent of roses and the rather more heady perfume of Jasmine.

They still grow roses, and they still grow Jasmine, but the heavy British duties have almost killed the French scent trade for Great Britain. So instead of growing Jasmine and roses many of the scent factories are growing tomatoes.

Slowly the cult of drinking tomato juice has spread into France from England and the United States.

Until recently France imported her tomato juice, but now the factories of Grasse are bottling and selling homegrown products, and not only are the scent factories making tomato juice, but they are also bottling the juice of the grape.

No Motor Boats In Venice

Attempts To Motorize Gondolas Do Not Meet With Approval

After futile attempts to convince Venetians that motorized gondolas would speed up the city's business, Venice authorities have ordered the withdrawal of such motor craft from the city's canals.

While other Italian cities were modernizing their means of transport by substituting old-fashioned carriages and buggies with fast Italian motorcars, graceful, sentimental gondolas still reign supreme in Venice.

A few years ago a motorboat taxi service tried to supplant gondolas. Although it did not meet the public's favor, motorboats occasionally were used for long trips from Venice to the surrounding islets.

The latest attempt to modernize canal transport was attachment of motors to the gondolas. The motor was controlled by the gondolier's feet. He stood motionless in his boat, using his sweep only as a rudder.

The appearance of these boats progressing in little jerks along the canals was greeted with hilarity and ridicule by the local populace.

Authorities have issued orders that motorized gondolas be forbidden because they contrast with the aesthetics of the floating city.

Hard To Transport

South African Railways Do Not Like Carrying Giraffes

Add to the many problems besetting the railroads the one now facing the Kenya-Uganda Railway in South Africa. The bridges are not high enough to allow giraffes to pass underneath. If the business of exporting big game to the zoos of the world is going to grow, it seems that the giraffes will have to walk to Mombasa. Recently six were crated and railed. The journey was uneventful until the train approached a bridge. The engineer moved forward foot by foot, but the giraffes' necks were too long. Finally, the animals were unboxed, the crates were carried past the bridge and reloaded on the next train.

Turkey's New Tax Law

Women in Turkey between the ages of 18 and 60 will be forced to work as seamstresses on the roads for a week a year in future unless they pay six Turkish pounds, about \$5.00, annually as exemption tax. Hitherto this tax has only been collected from men.

Not Taking Chances

Rotarians Of Vicksburg Relying Cars To Stop At Railroad Crossing

The Vicksburg, Mich., Rotary Club members have taken a pledge always to bring their automobiles to a complete stop before crossing any railroad track.

The immediate reason for this pledge, which means simply voluntary observation of a precaution compulsory on public buses, is a record of five deaths at village crossings within the last 18 months. And with the ghastly record of recent tragedies at intersections elsewhere in Michigan fresh in mind, there is a sharp timeliness in the action of the Vicksburg Rotarians which should commend it to motorists everywhere.

Safety devices at railroad crossings ought to be as complete and as effective as care and ingenuity can make them.

But no device will protect the reckless driver from the consequences of his folly if he persists in hurling his car heedlessly across dangerous crossings.

The motorist who always makes a stop before crossing a railroad track is not in much danger of being run down by a train.—Detroit Free Press.

Menace To Wild Life

Many Animals And Birds Caught In Forest Fires

A story told by one man who was close to the fire in the Raner Lake section in Ontario gives some idea of the menace such blazes are to the wild life of the district.

He relates that he saw six deer, three moose, several foxes and porcupines and even some wolves trying to make their way out of a bottle neck in the fire zone by swimming a lake.

These apparently escaped but where they managed to get away many others must have fallen victims to the flames.

These small game the rabbits would be quite unable to get out, and partridge, for some reason, show a tendency to fly right back into the fire.

Fur bearing animals, too, would be caught by the fire, which even aside from the timber losses, would do a great deal of damage to the district's resources.

To Protect Jungle Game

"Fighting squads" for the jungle to control the activities of elephants, tigers and other big game in British Malaya, are among the suggestions being considered by Sir Thomas Comyn-Platt, after a tour of Ceylon and Malaya on behalf of the Society for the Preservation of Empire Fauna.

Mary—"Why do they keep lions at the central telephone office?"

Teacher—"Why do you ask such a question, Mary?"

Mary—"Well, when I call my daddy sometimes the central girl says, 'The lion is busy.'"

You'll Find Candlewicking Very Easy

Household Arts by Alice Brooks

Bedroom Beautified with Colorful Candlewicking Design

PATTERN 5402

Candlewicking or French knots in heavy cotton—either make a spread that will add charm to your bedroom. Candlewicking is very easy to do and makes patterns with each tubing. You can make it as you like it, or hand down as an heirloom for it will keep its beauty indefinitely. In pattern 5402 you will find a transfer pattern of a basket 15 x 30 inches; directions and illustrations for doing candlewicking or French knots; material requirements.

To obtain this pattern send 30 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Serious Nature Of Soil Erosion In Western Canada Is Threat To Agriculture

A Healthy Child

Experiment In Feeding Vitamins Conducted By Parents

McDonald Charles Miller, eight months old, of Dayton, O., will not have to eat spinach to gain vitality if an experiment being conducted by his parents ends as successfully as it has started.

Donald H. Miller, father of the baby, is a chemist. His occupation provides the answer for the experiment which has been responsible for feeding the child synthetically all the seven vitamins daily.

A crushed tablet, containing all the known vitamins, has been placed in the Miller baby's milk since the day of his birth. The child, who has been nicknamed "Sunshine Mac," has thrived on the diet. He is two pounds heavier, and three inches taller than normal babies of his age. Sunshine Mac cut two teeth when five months old. He now has three teeth and is cutting three more. Most babies do not cut a tooth until approximately a year old.

The child also has another distinction. He already has had two haircuts. When guided, he is able to walk.

Sunshine Mac never has been ill, and it is believed his special diet will help him to escape the usual children's diseases.

The American Medical Association is said to have studied the child's diet and habits and may make a report.

The child's health, and not the use he makes of his physical strength, is the aim of his parents.

"We do not intend that he should be a prize fighter, football player or engaged in any profession in which strength is an asset unless he desires it," the Millers said. "Our only aim is for him to become the world's most healthy person."

Drought Hard On Ducks

Agent At Fort Smith Reports Scarcity In Northern Areas

The western drought is playing havoc with the flocks of ducks that make their summer homes on the prairies. A. L. Cummings, district agent at Fort Smith, northwest territories, reported to the department of the Interior. The number of ducks in Wood Buffalo park is less than any year since 1925.

The park, located on the boundary between Alberta and the northwest territories, is the northern nesting limit of ducks.

A painting of Ramsay MacDonald, former British Premier, which has been stowed away for five years as "unwanted," has been sold for \$125 at Sunderland, Eng.

Nearly a century ago enterprising pioneers invaded the great western plains of the United States. Fifty years later the Canadian Pacific railway pushed its rails across the prairie provinces and over the lofty peaks of the Rockies and the Selkirk Mountains to the Pacific Ocean, and immigrants started to populate the western plains of Canada. This movement swelled to substantial proportions reaching its peak about 1910-12. Since the first settlements in both countries man has waged an intensive war against nature. Drought has been the greatest enemy.

Large portions of western North America have always been subject to drought. The record has been written in the trunks of trees and, in the plains regions, in the soil itself. Scientists are inclined to the conclusion, that contrary to popular belief, the climate is not changing, but rather runs in cycles. After a period of abundance in a certain area rainfall begins to taper off gradually and not abruptly. How low the curves will go or when it will start upward again cannot be foretold.

The operations of man has added to nature's calamities in the west. So, the only protection against erosion by the wind, was turned up by the plow and now the rich soil, reduced to a powder, is sucked up by the hundreds of millions of tons and carried for as far as thousands of miles.

Dr. Wyatt of the University of Alberta estimates that the removal of one inch of soil from a farm creates a loss of 300 pounds of phosphorus, 1,500 pounds of nitrogen and 15 tons or organic matter. The phosphorus alone thus lost would be equal to the amount removed from the soil by twenty crops of wheat, each yielding 50 bushels per acre. It would require 160 tons of farm manure to replace the nitrogen lost in each acre, or 5 tons sodium nitrate. It would require 1,600 to 2,500 worth of commercial fertilizer to replace the nitrogen lost from an acre by removal of soil one inch deep.

In the United States the soil erosion specialists say that 100 million acres have been essentially destroyed for profitable farming, that another 125 million acres are seriously impaired and that another 100 million acres are threatened. And further they say that the annual money loss to the United States from the erosion of the soil is not less than \$400,000,000, that the annual rate has been increasing and the cumulative loss put conservatively is already not less than 10 billion dollars. The average is not far off in another 50 years the cumulative loss may reach the staggering figures of from 25 to 50 billion dollars.

Conditions are similar in Western Canada to the United States but on the northern side of the line the ravages have not been nearly so extreme. However, it is obvious from the experience of the United States that agriculture is in a perilous position in Western Canada and that drastic and immediate steps are necessary to prevent enormous losses and the degeneration of those engaged in the occupation of farming. The chief hope lies in the increase of rainfall which records show is bound to come, but every effort should be made to standardize efficient cultural practices calculated to prevent wind erosion and to develop agriculture along systematic lines.—The Budget.

Gas Mask Marathon

Four Russian workmen lived in gas masks for 10 consecutive days without any ill effects. During this time they carried on their every-day activities and removed their masks only for four half-hour periods daily—for washing and eating. Every night they slept in the masks. One of the workers made a daily speech describing his experience.

Comfort For Engineers

The people who run the trains are asking more for the comfort of home for engine cabs. The U.S. Brotherhood of Railway Trainmen has petitioned for softer seats, foot warmers and padded arm rests.

WORLD HAPPENINGS BRIEFLY TOLD

Believed killed in the battle of Jutland, John Evans, stickler in the royal navy, turned up recently. He was discharged from the navy in 1919.

The grasshopper plague does not daunt farmers in Missouri. They are harvesting the pests for winter poultry feed.

The Women's Road Records Association standard figures for London to Portsmouth and back were reduced by 38 minutes by a woman cyclist, Mrs. Lillian Dredge.

Norman Prior, 46, was bound over for a year when he appeared in court at Battersea, Eng., charged with theft of \$12,500, his daughter's holiday money.

Personal treasures of royalty from the earliest times to the present will be shown at the Royal Treasures Exhibition next April and May as a special attraction for coronation year.

British Columbians spent more than \$14,000,000 on beer, wines and hard liquor in the 12 months ended last March 31. The figures were made public by the liquor control board.

A new British gliding record was believed set the other day when Philip Wills, shipping merchant, covered approximately 110 miles in his British-made machine. Previous record was 75 miles.

For the first time in many years, British Columbia wheat may be shipped to southern Alberta. Seed wheat may be obtained from a 12,000-acre farm near Creston, B.C., for drought districts in the south.

Discovery of several tar sands deposits between Lac du Nord and Lac Ste. Anne and other deposits west of Lacombe, containing enough sands for hard-surfacing "a good many miles" of roads, was announced by Hon. W. A. Fallick, Alberta minister of public works.

Honor German War Dead

Canadian Olympians Place Wreath On Grave Of Unknown Soldier

Canadian Olympians paid tribute to Germany's war dead, placing a wreath of maple leaves on the grave of the unknown soldier.

The ceremony, held in what was once the palace of Frederick the Great, attracted thousands promoting Unter Den Linden. It was the first in which an official Canadian party had honored the war dead of Germany since the armistice.

Dr. Ross Millar, director of medical services for the department of pensions and national health, represented the Canadian government. Grouped around the memorial with 80 members of the Dominion's Olympic team were representatives of the German foreign office and the British embassy.

The Canadian athletes, both men and women, travelled downtown by bus and paraded the last two blocks to the memorial. William "Torchy" Feden, world famous professional bicycle racer from Victoria, and Tom Allison, coach of the Canadian rowing team, marched at the head of the parade, carrying the wreaths.

Money For Television

B.B.C. Likely To Need More Funds To Launch Service

Although all plans for launching television service from London in October have been made by the British Broadcasting Corporation, more funds may be needed. Official regular three-hour daily programmes will begin at that time. A television staff of 100 has been appointed and are working in Alexandra Palace, new home of the project. "Our plans for television are complete," said a B.B.C. official, but no one can say what expenditures will be necessary for launching and maintaining the new service. Already the \$900,000 granted the Television Committee has been exceeded. Programme expenditure must be extra.

Madge—"If we are going to be married, you must give up smoking, drinking, and your clubs. Now isn't there something you should give up of your own accord?"

Ted—"Yes, all idea of marrying you."

A Remarkable Woman

Social Reform Worker In England Dies At 85

One of the most remarkable women of modern times died in London recently, at the age of 85, just when a great scheme of social reform which she started 30 years ago was coming to triumphant completion.

She was Dame Henrietta Barnett, founder of Hampstead Garden Suburb, who died at her home there, in South Square.

A friend of Queen Mary—who more than once visited the Garden Suburb to open new buildings—Dame Henrietta was the widow of the late Canon S. A. Barnett, who left a West End parish to work among the poor of Whitechapel.

She had a vast range of social activities, and her amazing health and energy up to the time of her breakdown just over 18 months ago are ascribed to five simple rules. They were:

Rise at 5:30 a.m. every day. Work very hard. Read newspapers carefully every day.

Eat very little; Say your prayers very often.

Dame Henrietta threw herself wholeheartedly into her husband's work in the East End. They persuaded a number of undergraduates, including the late Arnold Toynbee, to spend their holidays with them in Whitechapel, and out of the enthusiasm for social service thus engendered grew the world-famous institution known as Toynbee Hall.

How To Spend A Million

Interesting Contest Being Held In Middle-Western U.S. City

Fiction abounds with tales of the man who has a million dollars and doesn't know what to do with it, and once in a while it happens in real life.

In the current Atlantic Monthly, there appears the statement of such a one. The anonymous gentleman, who is vouched for by his bankers, lives in a middle-western city of 100,000. He is getting on and he wishes to leave the community a million dollars. The town has ample educational, library, playground, and recreational facilities. How, then, shall he leave his million so that it will do the most good? He offers a \$1,000 prize to the person giving him the best answer.

Here is, undoubtedly, the most interesting contest in many months. The public is eternally invited to devise advertising slogans and melting testimonials for various products, but telling a millionaire how to leave his million—that is a real contest. It sounds easy, but lest anyone thinks so, let him try to formulate a sane, workable plan for using a million dollars for the greatest public good.

A million dollars to be used in a way which shall benefit all, old and young, the butcher, the baker, the candlestick maker—it would tax the wisdom of Solomon or profligacy of Tugwell—Detroit Saturday Night.

Small Thanks For Favors

Free Publicity Space In Newspapers Seldom Acknowledged

We have often reflected upon the slowness of people to thank editors for the favors which newspapers do for them. Individuals and organizations are constantly asking for publicity to assist them in promoting various kinds of worthy causes. Space is the only commodity aside from circulation which publishers have to sell, and this is a fact which too many seem to forget. Some are even critical of the favorable notices which we give them and their projects. A still greater number forget to make any acknowledgment of the courtesy extended to them. We have in mind a biblical instance of ingratitude in which only one in ten was thoughtful enough to return with thanks on his lips and in his face.—Toronto Mail and Empire.

No Pure White Color

The color of perfect white does not exist on earth. Closest to it are new fallen snow and purest chalk. Third comes the whites made by science and industry. The results of three years study to prove this, announced as the first made scientifically, were given to the conference at the Massachusetts Institute of Technology by David L. Macadam of the Institute.

Used Crude Instruments

Doctor In East India Performed Operation Under Difficulties

An eye operation performed on a woman in India with hair pins, crochet hooks and a pair of embroidery scissors as makeshift instruments was described to the East India Association recently by Sir Henry Tristram Holland. He had been engaged in medical work in Baluchistan for 36 years, and is devoting his furlough to the raising of funds for rebuilding the hospital at Quetta.

"The woman had a double cataract," he said. "She refused to go to hospital, so I decided to operate under a juniper tree."

"A woman provided me with a fine crochet hook, which acted as an iris hook. From some hair pins we made a rough and ready eye speculum, and a pair of embroidery scissors served for iris scissors. I had with me some cocaine, a cataract knife and a pair of fixation forceps. I operated on both eyes and the old Pathan woman had an excellent result in spite of my treatment."

Sir Henry also told of a native upon whom he operated when the man fell from a palm tree. Immediately after the operation he was hoisted on to a camel and taken to the station to the nearest railway station to be sent to hospital. The man made a perfect recovery.

Historic Sites

Two More Monuments To Commemorate Settlement Of The West

Erection of two more monuments which will commemorate in stone the saga of the settlement of the west are under consideration by the historic monuments and sites board, Ottawa, Judge F. W. Howay, New Westminster, B.C., western member of the board, announced in Winnipeg.

One will commemorate the old Dawson road from the head of Lake Superior to Winnipeg. It will probably be erected in the neighborhood of St. Anne des Chenes, 25 miles east of Winnipeg. Judge Howay said, and may take the form of a cairn. Tentative plans indicate it will be built this year, for dedication next year.

The second monument will commemorate the founding of Fort Maurepas at the mouth of the Winnipeg river by La Verendrye. This monument will, according to Judge Howay, not only commemorate the founding of the fort, but will emphasize also the general trading importance of the spot.—Winnipeg Free Press.

Heads Poultry Judges Association

The department of agriculture disclosed that George Robertson, Dominion poultry husbandman, was elected president of the American Poultry Judges' Association at its recent Topeka, Kas. meeting. Mr. Robertson is the first Canadian to be given presidency of the association in its 53 years' existence.

Make This Newest Notion in Knits

Household Arts by Alice Brooks

You'll Find Them Easy To Knit

PATTERN 5678

For that youngster for school or for best, this simple knitted coat with matching hat is an easy solution to that wardrobe problem. Both coat and hat are mainly in stockinette stitch—the yoke, cuffs and hat band in a simple stitch in checkboard effect. Use sport yarn—it's inexpensive and durable. In pattern 5678 you will find directions for making the coat and hat in 4, 6 and 8 year sizes. Illustrations of them and of all stitches used, material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. S., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

AUGUST 16

SOVING AND REAPING

Golden text: Be not deceived, God is not mocked; for whatsoever a man soweth, that shall he also reap. Galatians 6:7.

Lesson: Galatians 6:1-10.

Devotional reading: Galatians 5:16-24.

Explanations And Comments

The Law of Harvest, verses 7 and 8. Make no mistake—God is not mocked; for whatsoever a man soweth, that shall he also reap. Galatians 6:7.

Lesson: Galatians 6:1-10. Devotional reading: Galatians 5:16-24. The Law of Harvest, verses 7 and 8. Make no mistake—God is not mocked; for whatsoever a man soweth, that shall he also reap. Galatians 6:7.

Deal Gently With Another's Trespasses, verse 9. Let the one who is detected in some trespass, brother, you are spiritual, you must set an example of gentleness; let each of you look to himself, in case he, too, is tempted.

Do Good, verse 10.—So then—since our reward is sure—let us make use of every opportunity to do good to all, and especially to those followers of Christ whose faith makes them one household, or family.

The Reward Is Sure, verse 9. "Folks that get weary in well-doing generally haven't done much at it, when you come to hunk up their records. The weariness is usually at the beginning, and sorts out the workers from the quitters." In due season we shall reap, if we faint not. "If we are putting thoroughness, sympathy, courage, kindness, and good honest toil into our work, we are putting eternal truths into the soil of our own hearts, and great will be the harvest" (Malcolm McLeod).

Royal Air Force

Creation Of A Volunteer Reserve Open To Civilians

Viscount Swinton, secretary for air, announced in the house of lords the creation of a volunteer reserve for the Royal Air Force. He said it was designed to provide an adequate reserve of pilots for the expanded air force and was open only to civilians.

Eight hundred pilots are required annually, compared with 60 before the expansion.

Age limit for the entry of the volunteer pilots will be between 18 and 25. They will receive an annual retainer fee of \$25.

The education committee will establish special classes in schools at Manchester, England, for children with impaired vision.

Upper Berths In 'Plane

Two-Storey Machine Just Designed Will Carry 66 Passengers

We are not quite sure if you can go up to bed in the Zeppelins but you may soon do so in a two-storey sleeper plane. From Holland, for example, comes word that Anthony Fokker has designed a "two-storey" passenger plane which will carry 66 passengers with adequate sleeping accommodations, dressing rooms and the like.

This new "F-56" is described as merely an "enlargement" of the Fokker "F-36", now in service on the "London, Amsterdam and Berlin route." The latter carries 32 passengers comfortably. The new "F-56", equipped with most of the modern conveniences, is not considered an experiment since its design on smaller scale has met all the tests of regular commercial service. Its maximum speed is figured at 225 miles an hour and its "cruising speed" at 200 miles in high altitudes and 185 miles at 6,000 feet. Its "about ceiling" is reached, we are told at 26,000 feet, while the "service ceiling" is 24,700 feet.

The famous Dutch designer apparently foresees an era of extremely "high-flying" air liners that will make their long-distance flights at altitudes around 20,000 feet. Nothing is said about the cruising range of his hotel-type cruiser, but presumably his design will adopt it to transatlantic service and provide fuel storage sufficient for the long distances overseas routes where refueling stations must be few and far between.—Brandon Sun.

Germany Buying Back Steel

Scrap Metal From Scapa Flow Derelicts Being Re-Smelted

The German battleships surrendered after the war at Scapa Flow. They are going back to Germany as part of their modern navy.

Their steel plates and scraps are cut into suitable lengths for the long distances overseas routes where refueling stations must be few and far between.—Brandon Sun.

The scrap metal is taken to the German steel works and there remelted into ships' plates for warships.

Incidentally, many of the steel plates of the liner Queen Mary were forged from the remelted steel of the German battleships, and some steel on board her also came from the Mauretania.

Staging Unique Race

Nova Scotia Ox-Teams Will Show Their Speed

Nova Scotia's "ox-teams," "slow-moosies" of coastal villages, are going to get a chance to show what they can do.

Officials of the Halifax district trades and labor council announced the "race of the ox-teams" for Saturday, Sept. 3, Labor day. They haven't decided the length of the course yet, nor the time limit.

Already one entry is in. The colored people of Preston, near Halifax, entered "Gee-Haw," the racing pride of the village.

"Gee-Haw" and the others, if any others enter, will pull the regular ox-cart. It's a go-as-you-please event—walk, run, trot, gallop or pace.

Buenose Fitted With Engines

Champion Fishing Schooner Makes Trial Spin Under Power

Not quite so rakish with her topmasts and bowsprit removed, but not so dependent on the whims of wind and wave as her old self, the international champion fishing schooner Buenose made her first trial spin under power recently.

With 300 passengers aboard, the schooner drove out to the Cross Island buoy and returned. Captain Angus Walters said the change made little difference in the working and manoeuvring of his ship.

She made nine miles per hour under power, he said, and would do better after the engines had been broken in.

Buenose will not be out of any future fishing schooner races. At a moment's notice her two new engines can be removed and the old bowsprit and topmast returned to their proper places.

Cheap motorty is usually an expensive luxury

AIR MINISTRY OFFICIAL LOSES HIS POSITION

London.—Prime Minister Baldwin directed that Sir Christopher Bullock, permanent secretary to the air council, be dismissed from the civil service.

Mr. Baldwin's action was the sequel to a sensational white paper recording the findings of a board of inquiry established to investigate discussions alleged to have taken place between Sir Christopher and Sir Eric Geddes, chairman of Imperial Airways, Limited, and Major G. E. Woods-Humphrey, managing director of the air firm. The discussions were said to concern the possibility of Sir Christopher's future association with the Imperial Airways board.

In a minute accepting the findings of the board of inquiry, Mr. Baldwin said he was "glad to observe that, great as was the offence from the service point of view, no question of corruption was involved. As a consequence of the findings, the prime minister has directed that Sir Christopher Bullock be dismissed from the service."

Four conversations between Bullock, Geddes and Woods-Humphrey were investigated. The board, in their conclusions, stated: "At each of the four conversations which were the subject of our inquiry, Sir Christopher opened up with the chairman or the managing director the subject of his future association with Imperial Airways."

"While we are not criticising his desire to link his future with that company, we think that the special intimate relations existing at all times between the air ministry and the company make it intrinsically improper for him in any circumstances to initiate conversations with its chairman or other representative of the company in furtherance of that desire. It was in our judgment the more improper at the time he chose."

The report refers to the civil service code, and then adds:

"We cannot escape the conclusion that Bullock's conduct was completely at variance with the tenor and spirit of this code, which in our view clearly precludes a civil servant from interlarding public negotiations entrusted to him with the advancement of his personal or private interests. Yet we cannot but think that it was the official position he held that provided him with the vantage ground from which he was able to press upon the representatives of this company his personal suggestions which were unwelcome as they were embarrassing."

"We think the whole course of these proceedings shown on the part of Sir Christopher a lack of that instinct and perception from which should be derived a sure guide by which the conduct of a civil servant should be regulated."

Receive Cash For Gold

Placer Miners In B.C. Sell Direct To Provincial Government

Victoria.—Virgin gold valued at \$10,000, washed from the streams of British Columbia, has been acquired by the provincial government in the last year under its small purchase plan for placer miners, the department of mines estimated. The amount purchased was 304 ounces.

Little pokes of gold dust come to the assayer's office every week from gold commissioners in outlying parts of the province. Some have an ounce, others have less.

The government pays the miners \$28 an ounce. Previously the miners had to save up enough gold for a shipment to the Dominion assay office, but now it is cash on the spot. The provincial government makes up the shipment and the gold is resold to the Dominion government.

More Coal Produced

Ottawa.—The Dominion bureau of statistics reported Canada's coal production last June at 1,022,385 tons compared with June, 1935, output of 830,693 tons and a five-year monthly average of 859,485 tons. Coal production was only slightly less than a year before.

Tourists In Britain

England Entertains More Overseas Visitors Than For Six Years

London.—Reliable statistics show that England is entertaining more overseas foreign visitors than for six years. There has been a notable increase in several recent seasons in the influx from the continent which has compensated for a heavy decline in the numbers of American tourists. Nevertheless Americans again arrived this year to the number of 137,500 in June, 4,000 more than during the previous June.

Meanwhile, France, according to the French chamber of commerce, suffered a drop in the number of tourists of about 700,000 due largely to the high cost of living and the electrified political atmosphere of the continent generally.

Meetings have already been arranged this summer for hotel organizations to consider the prices to be charged during the coronation celebrations next year. Reputable hotel keepers of all grades are evincing an anxiety to suppress a disposition to "tinge" tourists. The ordinary business or regular customers will obviously be dislocated, for which some compensation is naturally expected. Overseas visitors in small numbers who are content to find lodgment some distance from the heart of London will probably find no difficulty in obtaining accommodation.

Forest Fires

Lightning Blamed For Fires In Southwestern Alberta

Calgary.—"Dry" lightning—so termed by foresters here because it is unaccompanied by thunder or rain—caused concern to foresters in southwestern Alberta where timberlands were flameswep a week ago.

Lightning struck twice in isolated districts, one fire starting atop a mountain at the headwaters of Galea creek, and the other near Trapp creek, in the Highwood valley. Forestry crews were checking both fires. Other fires were still burning in the Castle river and Highwood valley, but all were reported under control as hundreds of men maintained guard along the fire front.

Must Remain Friends

French Minister Of Pensions Stresses Feeling For Canada

Rouen.—The friendship binding Canada and France must remain strong and indissoluble, because it is one of the greatest guarantees of peace, Albert Riviere, minister of pensions, declared here at a banquet tendered 5,000 Canadian war veterans who arrived in six special trains from Paris.

The minister stressed France's friendship for Canada, pointed out the significance of the unveiling of the memorial to Canadian Great War dead at Vimy Ridge, and expressed regret the veterans were about to leave for home.

Holiday Cruise

Two Destroyers Will Convey The King's Yacht

London.—King Edward made his sixth flight since his accession to a quick round trip to visit his mother in Sandringham.

The king's flight to Queen Mary's side was a reunion before his leaving, to join his guests on the yacht Nahlin for a holiday cruise through the Mediterranean.

After a few hours at Sandringham House the king flew back to London.

Two destroyers, the Grafton and the Glowworm, were assigned by the British admiralty as a convoy for the yacht Nahlin.

Follows Old Route

Vancouver.—Mrs. S. Kirkland Vesey of London, England, great grand niece of Sir Alexander Mackenzie has arrived here. Mrs. Vesey has already travelled down the Mackenzie river to Athabasca, over the route first covered by her great grand uncle and now intends to go to Bella Coola, Wash., where Mackenzie viewed the Pacific ocean in 1783.

Royal Treasures

London.—Personal treasures of royalty from the earliest times to the present will be shown at the Royal Treasury Exhibition, next April and May, as a special attraction for coronation year. 2183

OFFERED POST

The Marquess of Willingdon, former Governor-General of Canada, and former Viceroy of India, who has been offered the Presidency of the British Broadcasting Corporation.

Tourist Traffic

Says Tourists Visiting Canada Will Spend \$300,000,000 This Year

Ottawa.—Tourists from the United States and other countries visiting Canada this year will spend \$300,000,000, it is estimated by Leo Dolan, director of the Canadian travel bureau. Tourist traffic into Canada this summer shows an increase of about 15 per cent. over last year. In June actual number of tourists visiting Canada was 1,632,485 compared with 1,481,858 in the same month last year. In July, 1935, tourists numbered 2,500,000 and 2,800,000 in August. It is expected the number will reach 3,000,000 the present month.

Peace Gardens

Negotiations Under Way For International Peace Gardens In Europe

Toronto.—The idea of establishing international peace gardens, similar to the one on the Manitoba-North Dakota border, was spreading rapidly. Henry J. Moore, of suburban Islington, told the 39th annual convention of the Canadian Florists' and Gardeners' Association. Negotiations were under way for gardens on the borders of Latvia, Estonia and Lithuania. He was optimistic enough to hope France and Germany may establish a garden on their border, he added.

Chief Justice May Retire

Hon. W. C. Simmons Appointed To Alberta Court In 1910

Calgary.—The Calgary Herald published the following newspaper story: Retirement of Hon. W. C. Simmons, chief justice of the Alberta supreme court, will take place September 1. He was appointed to the supreme court bench in 1910, after serving in the Alberta legislature as a Liberal member, for Lethbridge constituency. He became chief justice of the trial division of the supreme court in 1920.

ADMIRAL TAKES OVER NEW COMMAND

Admiral Sir William Fisher takes over his appointment as Commander-in-Chief at Portsmouth. During the ceremony he received Admirals and officers aboard Nelson's old flagship "H.M.S. Victory." Here we see Sir William at the right shaking hands with one of the officers.

Refugees From Spain

United States Citizens Tell Story Of Narrow Escape

Boston.—The first United States refugees to arrive here from the raging civil strife in Spain told tales of horror and bloodshed.

Burned churches, sudden aeroplane attacks, fear of death and roaming bands of young men and women all heavily armed were part of the descriptions related by Americans, mostly women, arriving on board the S.S. Exeter.

A New York portrait painter, Donald Newhall, told how he, his wife and two other New Yorkers were lined up at a roadside in Minorca by Spanish soldiers who leveled their rifles at them.

Only the intervention of a Spanish woman, who shouted "They're English," saved them, Newhall said. Later a top sergeant guarded them. Another American woman, Elizabeth Healey, secretary of the Co-operative school for student teachers, described scenes of rioting and burning in Malaga which she saw from an ancient Spanish fort situated on a hill a few miles away.

Wheat Exports Higher

Increased Almost 80,000 Bushels Above Previous Crop Year

Ottawa.—The Dominion bureau of statistics reported total exports of Canadian wheat for the crop year ended July 31 at 222,215,279 bushels, an increase of almost 80,000 bushels above the figure for the previous crop year.

Overseas exports totalled 172,045,574 bushels compared with 116,748,931 and United States imports of Canadian wheat 50,167,705 compared with 25,894,124.

Exports during the last week of the crop year were 5,288,657 bushels of which 4,102,657 went overseas and 1,184,000 to the United States for consumption and milling in bond. The total was 4,052,790 greater than in the corresponding week last year.

New Radio Station

Canadian Commission To Erect Station On Lulu Island

Vancouver.—Mayor G. G. McGeer turned the first sod for a new Canadian radio commission broadcasting station on Lulu Island which will be equipped with a 5,000-watt transmitter.

Plans for stepping up CBC's 500-watt station, under discussion for more than a year, materialized two weeks ago with the letting of a contract for the new station.

A 40-foot tower and new studios are expected to be completed by October.

Protest From Edmonton

Edmonton.—Protesting "dumping" of 28 Pacific coast men near Edmonton to handle railway construction work when hundreds of unemployed here are available for "this or any similar work," Mayor Clarke wired to A. E. Warren, Winnipeg, vice-president, Canadian National Railways, "To please make arrangements to take all these men back to their homes at once."

MUST MAINTAIN THE INTEGRITY OF BRITISH EMPIRE

Orillia, Ont.—The integrity of the British commonwealth of nations must be maintained and trade routes must be kept open, Lord Snell, Liberal leader in the British house of lords, told the Canadian Institute of Economics and Politics at Geneva Park, near here.

Giving the first of a series of three lectures, Lord Snell said two out of three meals eaten by Englishmen every day must be imported because "we are as short of raw materials as any country in the world."

Sufficient naval power must be maintained to enable England to import its necessities. England's foreign policy sprang from two sources, he said, the necessity of looking after England's interests and a moral and human side.

"We have many diverse interests to defend, a nation so diverse and detached as our own must have a flexible foreign policy. Since the great war the British foreign policy has had two main aims: There must be no war in which England is engaged unless any of her major interests are threatened by another power. We must seek to prevent war by collective security, by honoring our word when given."

"The British empire policy depends to some extent on Canada as the Dominion's proximity to the United States forces Britain to work in close association with that country," he concluded.

Friendly Relations

Canada Looking Out Broadened Windows For World Trade

Victoria.—United, Canada is looking out broadened windows at a vision of trade and friendly relations with the world, Hon. J. E. Michaud, Dominion minister of fisheries, told the Laurier club.

The minister said he had been vastly impressed by his first official journey over the Rocky mountains. He looked to achievement of a national vision in Canada, where provinces of the east would know and understand the provinces of the west, and all work together in the common ideal of a united and progressive land.

Claims Russia Responsible

Official Vatican Organ Sees Soviet Hand In Spanish War

Vatican City.—While official Rome was still withholding its reply to the French note regarding a three-power declaration of neutrality towards Spain, the Osservatore Romano, official Vatican organ, charged the Moscow Third International was chiefly responsible for the Spanish civil war.

"The Soviet Union," the paper said, "while not acting as the Soviet government, but as the Third International, had sent to Spain its principal 'specialists,' who are against 'order' and who commit 'atrocities' against the rebels."

Plan Drought Conference

Situation In Western Canada To Be Discussed At Ottawa

Ottawa.—The drought situation in western Canada will come before a conference of Dominion and provincial representatives probably on August 17. The date is tentative, but it is regarded as probable in view of the fact that Hon. J. C. Gardiner, minister of agriculture, will be back in Canada then.

It was considered desirable to have Mr. Gardiner, who is from Saskatchewan, attend the conference. In addition to Mr. Gardiner, some other cabinet members who have been overseas will be back in time for the meeting.

Rail Commission For West

Ottawa.—The board of railway commissioners will leave here September 6 for a series of hearings throughout the west. The itinerary has not been completely set but hearings will be held in Winnipeg, Saskatoon, Edmonton, Vancouver, Calgary, Swift Current and Brandon.

Registration for Dividends.

The forms for registration for social credit dividends have been issued, and all bona fide citizens of Alberta have been invited to come forward and register.

The form for citizens very properly starts off by asking his or her name, residence, and the year, month and day of birth. With regard to the latter, why not go a little further, and get the hour and minute of birth?

The question "state of health" is a poser. Will your answer "Health good" reduce the amount of your dividend?

The questions which ask if individuals will accept certain percentages in "Alberta Credit" appear ridiculous, as the Government is asking the individual to do what they themselves refuse to do.

As Premier Aberhart promised, and still promises, that the "dividend" would be paid to every bona fide citizen, it is superfluous to inquire as to what his present income is.

The list of questions calculated to give the amount of indebtedness of individuals can be of no value to the Government, at least as far as it affects the paying of the "dividend." The Government are going to be able to (or are not going to be able to, as the case may be) pay a certain sum of money each month to every bona fide citizen. In the Social Credit Manual it is stated (for illustration only) that "..... Basic dividends should be \$25 a month for every bona fide citizen, male or female, 21 years or more." On page 14 we are told that "..... This the, say, \$25 a month) is supposed to provide for the bare necessities of food, clothing and shelter for every bona fide citizen, whether he works or does not work, and he shall not be required to pay it back or work it out."

"Coffin Nails."

Since Canadian women, young and old, as well as men and boys, have gone in so strong for smoking cigarets, the national consumption in Canada shows an amazing increase, according to figures just made available at Ottawa for the fiscal year.

Consumption has jumped from 401 million cigarets 5 years ago to over 5310 million in the last fiscal year. Monthly figures show it is going up steadily.

But the cigar smoker is gradually in the decline. Five years ago, 152 million cigars were consumed. Last year it was down to about 125 million, but this was 10 million of a come back from the low record for all recent years, 1933, when it was only about 116 million.

Canada Year Book for 1936 Is Out.

Giving complete statistics on Canada's natural resources, production, trade, transportation, finance, education, and presenting a comprehensive study of the social and economic condition of the Dominion, the 1936 edition of the Canada Year Book, published by the General Statistics Branch of the Dominion Bureau of Statistics, is off the press.

Among the special features in the 1150-page volume this year are a special article, "Canada on Vimy Ridge," and statistics covering the construction industry in Canada.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile flows freely, your bowels are clean. It just decays in the bowels. Get those bowels clean. You get clean, healthy, and you feel good. You feel good, and the world is yours.

A new bowel movement doesn't always get at the cause. You need a good laxative. The Little Liver Pills get at the cause. They make the bile flow freely. They do the work of nature but have no action on the nerves. Ask for Carter's Little Liver Pills by name. It stubbornly refuses anything else. See.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER III—Continued

Back of them the sweat-grimed workmen crowded away from the tomb. Their work was done, but they were still plainly uneasy, though there was not a word from any of them.

There was no light in the place save that which came from the flickering torches carried by Professor Ellison and John Lessing. Their eerie lights were awesome, as they played over the rose stone sarcophagus which plainly had not been touched in centuries until the laborious work of the archaeologist's workmen had pried it from its place.

Starr felt choking as the light went from spot to spot, over the walls to pick out the beautiful paintings. That smell of the grave was overpowering, terrible. The silence, too, was terrifying, coming so soon after the clamor to which they had become used.

Then the disc of her father's light came to rest at last upon a spot high in the wall, over the sarcophagus. It was ancient Egyptian symbol writing and of course Starr could not make it out, but her father did. He cried out in excitement:

"The famous curse of Tut-Amen-Ra! We've found it, Lessing! We too, are famous!"

A strange chill settled over Starr, so that everything in that ghastly place danced before her eyes in the flickering torchlight—the curiously shaped bowls, the hammered gold and silver, strangely shaped bottles, queer, tall ancient lamps. They meant nothing to her. She could think of but one thing, and all her presentiments crowded up into her throat to choke her more surely than that terrible smell of the place hidden for so many thousands of years from the outside world. She cried out sharply:

"Curse! What do you mean?"

He explained briefly. "It means, my dear," he said, but his voice was oddly hushed. "That in thirty centuries no living soul has passed those doors. Those ancient words spell a warning to the first who dares to violate the sanctity of the tomb. Don't let it alarm you, Starr. That same curse has been found many times before. It's superstition is outworn."

But was it superstition? Down fell her heart Starr could not make herself believe it. That curse was a warning! A warning of death!

Starr glanced about her fearfully, overcome by her fearfully, overcome by the place. The heat, too, as well as the tomb-door, was almost insupportable. Her head was reeling; she felt as if she would swoon, but her

brain was beating out an insistent warning. It was not of this place alone that she was afraid. There was the outside, too. They were isolated from civilization, were camped at the edge of nowhere, beside a vast cemetery of dead and gone Egyptian royalties. She could imagine anything happening here!

Her panic grew by leaps and bounds as she covered by the gaudily painted rock tomb walls. "Daddy! I'm afraid! Afraid! Let's not go any farther! It's a sacrilege—it must be! Suppose that curse came true! Suppose we do bring down on ourselves the vengeance of their gods!"

But the two excited scholars had no time to listen to the protests of a frightened girl. It seemed hours to her, covering in the background looking grotesquely out of place while they explored the tomb before approaching the sarcophagus, exclaiming over the stoppered flasks, the curious jeweled cups, the bowls, the golden, jewel-encrusted perfume burners, a gilded couch carved in ancient design, the dozens of things that would add to Professor Ellison's collection and his fame. In the half-darkness, Starr looked like something out of the past here, as her face glowed luminously white against her black hair, and brought out the frightened mystery of her long black eyes.

The rocky, painted walls were oozing with dampness. Never in her life had Starr imagined anyone could feel so terribly shut in, trapped. As she glanced through the open door, she noticed that the Egyptians who had been in charge of the Arab workmen had prostrated themselves on their faces. She was not the only one who was afraid.

Her father was tracing the hieroglyphs on the top of one of the two inner lotus sarcophagi which rested inside the big open granite one.

"Tut-Amen-Ra!" He moved his hand across to the second one, "Amen-Ra! I knew it, Lessing! I knew it!"

Journey's end! Starr felt herself infected with some of the explorer's excitement, but it was a strange excitement, pregnant with vague forebodings.

The two men were carefully lifting out the sarcophagus of Amen-Ra, almost like the body of the ancient priestess herself in its startling representation of the one who lay inside it. Their shadows, gigantic, grotesque, danced over the painted walls. The only sound was of tearing wood as they ripped it away from the mummy inside.

It had been a ghastly enough tableau at first, when they had all merely stood still and looked, in the blue-white light, like some awful snapshot thrown on a poorly lighted screen, and with all their blue-white faces staid. It was more terrible now that the stereoscopic had come to life and become a moving picture, as if the reading of that curse had been the signal to start them all moving and the terrifying picture to spring into action fitting in ghostly silence through the shallow blue-white light.

Starr clenching her teeth hard, watching her father, whose gaunt features were shining with sweat. Then through the blue-white mist, Starr, watching breathlessly, fascinated, saw the figure of a woman lying in the sarcophagus, a woman swathed in interminable lengths of wrappings which her father, with John Lessing's aid, was unwinding—an unwinding that could go on forever, it seemed.

Suddenly she gave a gasp of awe that followed a moment of what felt like suspended animation. Exposed to her gaze was a marvelously preserved mummy—the mummy of a woman who had lived and loved three thousand years ago. A hint of her tragic beauty still remained. But even as Starr looked, a frightful thing happened. Starr never could understand how it had come about. Surely her father and John Lessing, versed as they were in Egyptology, should have taken no such chances. They should have known—

The mummy was crumbling! Going to nothing! "Dust to dust!" The contact with air had done it. "It was the most terrifying thing Starr had ever seen. For the moment she watched, she felt that she, too, was crumbling. That she was not real. Nothing was!

In a few moments, there was nothing left but dust, and a parchment

scroll Ama-Sun had held in her hand. John Lessing reached for the scroll.

Starr clapped both hands over her eyes to shut out the sickening sight of that dust woman. Her wild scream echoed eerily through the rocky chamber. After awhile she became conscious that John Lessing was saying something.

"It's a heathen writing," he was saying, his voice choked, unnatural. "But I can make it out. Shall I read it?"

"Of course," Her father's voice sounded so reassuring.

Then John Lessing was reading, his voice sounding as if it also had come from a three-thousand-year-old tomb.

Long shivers took hold of Starr's body, shaking her like a leaf. It was a voice from the dead she was hearing, the terrible curse of Tut-Amen-Ra. Here in the tomb, with the knowledge of what they had done, the ancient words, translated by the archaeologist, held a sinister significance.

It seemed that John Lessing's voice would drone on forever. Her father was icily calm, but was forcing himself to that pose, Starr was sure. John Lessing's face in the blue light was ghastly—waxen. His voice shook.

"To thy children, and thy children's children, ill fortune; disaster; death; inevitable death!"

When Starr dared to uncover her eyes, the Egyptians in charge of the digging, who had prostrated themselves, had fled. Nor was there one of the sweating Arabs in sight. She and her father and John Lessing were alone in the deserted tomb. Horror turned her to a thing of ice as she saw the men's faces. The eagerness, the excitement, were swept away. They were afraid! Afraid of what they had done—afraid of the curse!

This knowledge was all that Starr needed to destroy the last remnants of her own composure. A strained, heavy silence cloaked them. The place was alive with mocking spirits. When John Lessing spoke his stricken voice sounded as if it came down through the ages.

"Ah!" he whispered hoarsely. "I've got to get out of here—air! I'm through!"

With a superhuman effort Starr forced the life back into her frozen limbs. She fled, like a white ghost herself, out into the desert night. Out to where the unforgettable dusk of Egypt, that once had fallen so benignly over the Libyan desert, was already gone. For Starr it would never come again—that once beloved dusk through which rocks showed like black amulets, and the sky took on all the colors of the spectrum, through wonderful transformations of sky blue to delicate pink, then suddenly to turn into deep violet. It's beauty was gone for this night—forever for Starr Ellison.

That night in their camp at the edge of the desert, John Lessing fell ill with a tropical fever. He died twenty-four hours later. His last words in a high-pitched, delicious voice were:

"It's the curse of Tut-Amen-Ra! It's got me, Ellison! I'll get you, too—and Starr!"

Her father was a broken man after the death of his friend, his life-long companion. He did not explore any further into the forbidden resting place of the long-dead lovers, nor did he touch any of the treasures which he had gloated over. He never again looked at them.

Camp was struck immediately and

he and Starr returned to America and the New England home where he had planned that his book which was to have made him famous would be written. But the book was never written. Never did he so much as glance at any of the notes Starr took so painstakingly taken. As, day by day, he visibly faded, it seemed indeed that the curse of Pharaoh was reaching across the ocean. Everything he did, everything they both did, was attended by misfortune.

The climax came when, with the first bank failure, Professor Ellison, never a business man, was caught, and became bankrupt. Even his Egyptian treasures brought him little. Once he had thought he would never part with them, but now he was eager to get them out of his sight. With money at a premium, however, they were worth little, far less than he ever knew, when the last went to pay for his days which were swift in passing.

He realized he was going, though. He said one day:

"I'm a doomed man, Starr. It's the curse. There's no escaping it." She pleaded with him, sheltering his weary head in her arms.

"Don't, Daddy! Don't! I'll never believe it. — You must not!"

But she herself was beginning to feel much of the same curious fatalism which gripped her father, a sense as of waiting for the inevitable to happen.

(To Be Continued)

Some men are shaved a little cleaner, bathed a little cleaner and dressed a little cleaner and their mind's a little keener, but when it is said and done we are all headed for the last round-up.

Little Helps For This Week

In Him we live, and move and have our being. Acts 17:28

Yea in Thy life our little lives are ended. Into Thy depths our trembling spirits fall. In These extended, gathered, comprehended. As holds the sea her waves, 'Tis Thou holdest all.

Where then is our God? You say He is everywhere; then show me anyone that you have met Him. You declare Him everlasting; then tell me any moment He has been with you. You believe Him ready to help those who are tempted and to lift those that are bowed down, then tell me when you knew you received His help. These are the testing questions by which we may learn whether we too have raised our altar to an "unknown God" and pay the worship of the blind, or whether we commune with Him "in whom we live, and move, and have our being."—J. Martineau.

A Real Cosmopolitan
"Pat," says Mike to his workmate, "what's a cosmopolitan?"

Pat thought for a moment, then said, "Suppose there was a Russian Jew living in England with an Italian wife, sitting at a French window in a room with a Turkey carpet on the floor. If this man drank American cream soda while listening to a German band playing 'Come back to Erin' after supper of Dutch cheese made up as a Welsh rabbit, then begorra, you're safe in calling that guy a cosmopolitan!" 2163

Iron the Easy Way

WITH
Coleman SELF-HEATING IRON

Why You Should Have It

Priced as Low as \$5.95!

Now you can iron in the comfort of your home. No need to go to the laundry. No need to wait for the ironing man. No need to pay extra for the ironing man. No need to pay extra for the ironing man. No need to pay extra for the ironing man.

1. Costs only \$5.95
2. Lightly ironed
3. Irons in a few seconds
4. Easily used by all
5. Machine-reversible
6. Hottest at the point
7. Irons with least heat
8. Saves 1/2 ironing
9. No need to hold

Hungarian Partridge, Oct. 1—Nov. 30.

Fox, Nov. 1—Jan. 31.
Mink, martin, otter, Nov. 1—March 31.

Muskat, Mar. 1—April 30. South of N. Saskatchewan river, no open season.

Sunday Shooting is prohibited.

ball tournament at The Fort. The Grove's contingent made a very good showing.

The earliest in a number of years, the first threshing was done on Monday at the Frank Wild farm, a few miles east of Spruce Grove. The yield of this early wheat was around 20 bu. to the acre. Experts say it'll grade No. 2.

Auctioneer Ball held a sale here last week of the stock of E. E. Womack. The milk cows brought a fair price, as also did the horses.

For a big meal or a good lunch, try Jack Nichols, at the Hotel Restaurant.

STANLEY—BATES.

Mr. and Mrs. William Bates of Spruce Grove announce the marriage of their daughter Miss Dorothy Jean Bates to Mr. Wayne Kirk Stanley, son of Mr. and Mrs. Stanley, of Hanna, Alberta. The wedding took place in Stony Plain on August 1.

Where Grain Is Scarce.

High River Times: There is a determination to salvage every head of grain possible, and with this in view High River farmers have turned investors. On farms where combines are not used, binders and cutting equipment have been adjusted and rebuilt to "catch anything that sticks its nose out of the ground."

FOR SALE.

The Christie 4 room house, on lots 1 & 2, block 3, Main St., opp the Royal Hotel, Stony Plain. For further information Apply at The Sun Office.

Hennig—Enders.

At St. Matthew's church, on Monday, Aug. 10, Miss Louise Julia Enders, daughter of Mr. and Mrs. Henry Enders, of Stony Plain, became the bride of Mr. Valentine Hennig, son of Mrs. V. Hennig of Wembley, and the late Valentine Hennig. The ceremony was performed by Rev. Emil Eberhart, the pastor.

The bride was attended by Miss Mary Enders as maid of honor; the bridesmaids were Miss Matilda Enders and Miss Edna Hennig. The groomsmen were Mr. Alfred Enders and Mr. Walter Rosnau.

Stony Plain and District.

Mr. D. A. Stuart, the popular banker at one time in charge of the bank here, was a visitor in Stony on Friday. "Doug," as his intimates here called him, is now interested in mining in B. C.

Mr. and Mrs. Jac Miller, Wembley, arrived here last week, on a visit.

Mrs. P. Werner arrived home on Friday from Misericordia hospital.

Mrs. H. Oppertshanser and daughters have returned from a vacation spent at Pigeon Lake.

Where was Stony's big, fat poundkeeper Monday morning when a brindle cow was meandering up the Main St. granolithic, on the west side? Opposite The Sun office she stopped for a moment—but nothing happened.

St. John's Lutheran church, Blueberry, the Rev. H. Kuring pastor, held their Missionfest on Sunday last, August 9th. The visiting clergyman who assisted at the celebration were Rev. E. Eberhart of Stony Plain and Prof. A. Guebert of Concordia College.

Hard Time dance Hubbel's Beach, Sat. Evg., August 15.

BUTTER AND EGGS WANTED at The Royal Cafe.

Sporting Notes.

Stony's senior ball team attended the ball tournament at Fort Sask last week, where 8 teams were entered. Stony's team was successful in cleaning up on the 3 teams they encountered—beating Westlock by a score of 5-0, North Edmonton by 5-0, and St. Michael by 2-0. Herman Loeblich pitched all 3 games. Stony copped 1st prize, \$60.

At the League ball game here on Sunday, Gibbons vs. Stony, the former won by a good-sized score.

Our Three Classes.

An exchange remarks that there are at the present time in Alberta three classes—

Those who would hate to see social credit work if it would;

Those who wish it would but think it won't;

And those who have no doubt about it.

NOW A NEW BIGGER BAR

MORE SOAP AT NO EXTRA COST

The new Sunlight Soap—is the same pure, quick-dissolving soap that has lightened the washing burden of millions of housewives... the only soap with a \$5,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight-bar and save money.

Now a bigger bar in a single carton. The 4 small bars in one carton will no longer be obtainable.

A PRODUCT OF LATER BROTHERS LIMITED

Another Pioneer Passes.

Mrs. Elizabeth Kulak, beloved wife of Valentine Kulak, passed away at the family residence, Rosenthal district, on Tuesday, Aug. 11, at the age of 82 years.

She leaves to mourn her loss her husband; 8 sons—Henry, Philip, Jakob, Joseph, Peter, George, William, all of Rosenthal, and Valentine, of Vernon, B. C.

As we go to press, the date of the funeral had not been set.

Meeting on Friday Night.

Mr. Wm. Kelly announces that Kelly's Hall has been rented for the evening of Fri., Aug. 14, for the purpose of holding a meeting of social credit advocates, to arrange for the appointment of volunteers who will act as registrars in this district Monday, the 17th, the day set for registration throughout the province.

Colonel Bogey Says.

I see by the papers that a clergyman at a seaside resort has issued an invitation to "come to church in bathing dress." Maybe he thinks the service will be all wet.

Love is what makes a guy think he's in heaven while a gal is playing hell with his bankroll.

Swimming Rash.

Swimmers who submerge in the cool waters of the lakes in the district and come out with a warmly blushing hide which feels slightly scalded, have no occasion for alarm, says an Edmonton skin expert, who classifies it as "one of nature's little jokes."

During the past week worried parents had brought their rosy-skinned youngsters to the dermatologist, fearing the children had "something catching." In each it was found to be a minor skin irritation that results from swimming in lakes hereabouts.

The itch is said to be caused by a minute animal growth in the water which attaches itself to the skin of a swimmer but soon dies.
